Dean Alec Scranton
3100 Seamans Center
Iowa City, Iowa 52242

Dear Dean Scranton:

Thank you very much for the Engineering Scholarship. I am grateful that I have the opportunity to go to school at The University of Iowa, which is in part due to this generous award. Chemical engineering is an intimidating field, but I am prepared to work hard as I start my freshman year. I am extremely excited to begin my engineering courses, and I hope to see you around the college.

I am originally from Sioux City, Iowa. As I went through my college search, I was very interested in the open, team-style learning environment embraced by the College of Engineering at Iowa. When I made campus visits, I was happy to find a small community environment inside a large university that offers many opportunities for students.

Since I have arrived on campus, I have enjoyed seeing all of the things that are offered here. Exploring new parts of the Engineering building has become an interesting pastime between classes, and I have found so many great things. The study spaces and computer labs are perfect for focusing on homework, and they are comfortable places for long hours of studying.

The academic year is in full swing now, and has given me insight into the years ahead. I understand that this experience will challenge me every step of the way, and I welcome those challenges, for I know that they will better prepare me for my future career. Thank you again for choosing me as a recipient of this scholarship. It has already made a significant impact on my life and is sure to make an impact on my future.

Sincerely,
